10

11

12 Introduction

The EU Data Protection Directive (95/46/EC) sets the legal framework for attribute release within the European Union and European Economic Area. For more information on the requirements imposed, see Introduction to Data protection directive [DirectiveIntroduction].

The Data Protection Code of Conduct sets out practices for meeting the requirements of the Data Protection Directive. It defines a set of rules to be followed by Service Providers wishing to receive user attributes from the Identity Providers managed by Home Organisations. It is expected that Home Organisations will be more willing to release attributes to Service Providers asserting the conformance to the Data Protection Code of Conduct. For more information, see Introduction to Code of Conduct [CoCIntroduction].

This document defines a SAML 2.0 Entity Category attribute [SAML2EntityAttr] for Service Providers that claim conformance to the Data Protection Code of Conduct and a SAML 2.0 Entity Category support attribute for Identity Providers that are willing to interact with Service Providers conforming to the Data protection Code of Conduct.

24 Syntax

The following URI is used as the Attribute Value for the Entity Category attribute<u>and Entity Category support</u> attribute:

27 http://www.geant.net/uri/dataprotection-code-of-conduct/v1

28 **Semantics**

30

- 29 By asserting membership in the Entity Category, a Service Provider claims
 - that it is bound by
- 31 o the data protection laws in the European Union or European Economic Area, or
- a third country's domestic data protection laws which have been recognised by the EC as ensuring
 an adequate level of protection [ECWhiteList], or
- an international commitment into which a third country has entered and which has been recognised
 by the EC as ensuring an adequate level of protection [ECWhiteList], such as the US Safe harbour
 [USSafeHarbour]
- that it has committed to the Data Protection Code of Conduct for Service Providers [CoCforSP], and
- that it conforms to the SAML 2 Profile for the Data Protection Code of Conduct [CoCSAML2]

By asserting the Entity Category support attribute, an Identity Provider claims that it releases the requested
 attributes to a Code of Conduct committed Service Provider without administrative involvement.

41 **Provenance**

When an Entity's registrar (normally the Entity's home federation) registers the Entity's assertion of membership in the Entity Category it must perform at least the checks defined for a home federation operator in the Operator guidelines document [CoCOperatorGuidelines].

45 No requirements are defined for the provenance of an Identity Provider's Entity Category support attribute.

46 **Examples**

47 48	Entity category attribute (Service Provider):		
5 0	<entityattributes xmlns="urn:oasis:names:tc:SAML:metadata:attribute"></entityattributes>		
51	<attribute <="" th="" xmlns="urn:oasis:names:tc:SAML:2.0:assertion"></attribute>		
52	NameFormat="urn:oasis:names:tc:SAML:2.0:attrname-format:uri"		
53	Name="http://macedir.org/entity-category">		
54	<attributevalue>http://www.geant.net/uri/dataprotection-code-of-conduct/v1</attributevalue>		
55			
56			
57 58 59	Entity category support attribute (Identity Provider):		
69	<entityattributes xmlns="urn:oasis:names:tc:SAML:metadata:attribute"></entityattributes>		
62	<pre><attribute <="" pre="" xmlns="urn:oasis:names:tc:SAML:2.0:assertion"></attribute></pre>		
63	NameFormat="urn:oasis:names:tc:SAML:2.0:attrname-format:uri"		
64	Name="http://macedir.org/entity-category-support">		
65	<pre><attributevalue>http://www.geant.net/uri/dataprotection-code-of-conduct/v1</attributevalue></pre>		
66			
67			
68			

69 Usage

Enable Home Organisations / Identity Provider administrators to easily set up a global attribute filter policy for
 Service Providers committed to the Code of Conduct.

- 72 For related configuration examples, see
- Code of Conduct Cookbook [CoCCookbook].

- InCommon's R&S category [InCommon].
 - Shibboleth configuration instructions by SWAMID [SWAMID].
