Agreement for Operation of perfSONAR-installed Low-Cost Hardware (perfSONAR Small Nodes Project in GÉANT)

I, the undersigned, voluntarily agree to receive and operate one **perfSONAR Small Node**, provided without cost by GÉANT, in order to participate in the network of perfSONAR Small Nodes, as shown and described during the TNC 2016 BoF session: *perfSONAR on Low Cost Hardware*.

I hereby agree to the following terms:

Within 2 weeks of the signature of this document, I will install the Small Node in the network of my organisation, according to the given instructions and I will provide a publicly routed IPv4 or IPv6 address in order to establish a continuous 24/7 data feed to GÉANT perfSONAR central server.

I am free to use the collected data on any of my own systems, to experiment with perfSONAR built-in tools, and to add new measurements from my Small Node to the setup. Similarly, the data gathered from the network belonging to my Organisation will be available to other users to analyse and experiment.

I agree that the Small Node capabilities, the name of my Organisation and the email contact will be published in the perfSONAR Global Lookup Service and be publicly available.

I agree that I will not disable GÉANT perfSONAR support team administrative account in my Small Node and allow remote SSH access to provide remote assistance or support for my Node.

The provided equipment is a property of GÉANT and must be returned to the project manager, if and when requested. Otherwise, the equipment remains at my possession for any period of time, to my discretion. I may voluntarily stop its operation at any time and return the equipment to GÉANT.
